## SUMMARY

Detail-oriented Full Stack Developer with strong expertise in React.js for frontend development and solid hands-on experience in Java and SQL for backend and data handling. Proven ability to build responsive, performance-optimized web applications, integrate frontend with backend systems, and debug complex data and logic issues. Experienced in working on enterprise-scale products, customizing UI libraries, maintaining clean and scalable codebases, and collaborating across cross-functional teams to deliver reliable full-stack solutions.

## SKILLS

### Frontend Development

HTML, CSS, JavaScript, jQuery, Bootstrap, Tailwind CSS, Angular, React.js, Next.js

### Backend & Database

Java, SQL, Backend Logic Debugging, Data Manipulation, API Integration

### UI Libraries & Toolkits

Telerik, Metronic, Material UI, Material Tailwind

### Tools & Practices

Git, Version Control, MVC Architecture, Performance Optimization, Clean Code Practices

## PROFESSIONAL EXPERIENCE

### Technical Analyst – Stradegi Solutions

Mar 2024 – Present

- Led UI development for nFlows, an enterprise no-code solution platform, delivering scalable and reusable frontend modules using React.
- Enhanced and revamped existing UI components by implementing clean code standards and performance optimizations.
- Customized Telerik UI components to meet complex and dynamic client requirements.
- Collaborated closely with backend teams to ensure smooth integration between frontend and backend systems.
- Actively debugged and resolved backend issues related to Java logic, data manipulation, and SQL queries, improving application stability and data consistency.
- Analyzed backend workflows and assisted in fixing integration issues between UI layers and Java-based services.
- Mentored team members on frontend best practices, code quality, and performance tuning.
- Contributed UI enhancements across all in-house products by working with multiple cross-functional teams.
- Designed and developed an internal workflow management application to track:
  - Enhancements, defects, and daily check-ins
  - RD findings, overwritten files, and included plugins
  - Involved developers, release details, and issue tracking ensuring full project transparency and traceability

**Frontend Developer - Alphabet Techs****Jul 2022 – Mar 2024**

- Designed and developed responsive websites and dashboards using WordPress, Bootstrap, and Metronic UI toolkit.
  - Built and customized WordPress plugins to support client-specific e-commerce and business workflows.
  - Developed backend-integrated dashboards using PHP CURL for data fetching and visualization.
  - Handled client communications, gathered requirements, and managed ticket-based issue resolution systems.
  - Led the UI and functional development of a core e-commerce platform inspired by Shopify, from frontend design to feature integration.
  - Developed an admin dashboard module using Angular v14, improving usability, scalability, and maintainability of the platform.
- 

**EDUCATION****Bachelor of Engineering in Computer Science**

Loyola Institute of Technology,  
Anna University, Chennai, India.  
CGPA : 7.5

**June 2018 - March -2022**
